MANITOBA MINERAL DEVELOPMENT FUNDING FOR ELEVEN PROJECTS

Bit Space Development Ltd. (Flin Flon)

Bit Space Development Ltd. is a digital media studio that creates innovative learning experiences for education and training purposes using cutting-edge digital media technologies. They are partnering with University College of the North (UCN) to create a database for mining findings and develop a training tool for interested parties.

Garner Gold Mines Inc. (Lac Du Bonnet)

Garner Gold Mines Inc. owns three mining claims in Garner Lake, Manitoba, comprising 704 hectares of proven gold-rich ground. The company plans to identify and assess any heritage resources that may be affected by future development, followed by archaeological field work with qualified archaeologists.

King Global Ventures Inc. (Snow Lake)

King Global Ventures Inc. is a mining and exploration resource company that plans to install a processing facility for gold, silver, and copper recovery. They are seeking funding for a drill exploration project at their Dion Lake project in the Snow Lake region that will explore lithium and conduct field work with rock and chip/soil samples and airborne geophysics.

Lake Winn Resources Corp. (Flin Flon)

Lake Winn Resources Corp. is a Vancouver-based company that focuses on exploring and developing lithium and gold projects in Canada. Their gold belt project contains orogenic gold deposits, and based on the positive findings, Lake Winn plans to conduct a follow-up program.

Major Oil & Gas (Portage La Prairie)

Major Oil & Gas is a privately-owned company operating in Manitoba for 12 years, with previous focus on oil drilling in Souris. The company has shifted its focus to helium and has a team of skilled professionals in geoscience, engineering, land management, exploring, developing and refining helium elements in the Portage la Prairie area.

New Age Metals Inc. (Lac Du Bonnet)

New Age Metals Inc., a company with a large undeveloped palladium project in North America, has a significant lithium division and is the largest claim holder in the Winnipeg River Pegmatite Field. They are seeking funding to conduct a comprehensive field program to define historical showings, locate buried pegmatites, and identify new targets.

NiCAN Limited (Snow Lake)

NiCAN Limited is a mining company that focuses on nickel projects in known jurisdictions for nickel exploration. The company will explore a drilling project on the Wine Occurrence property to highlight the region's prospectivity for nickel, a strategic metal used in batteries and other materials.

Norway House Remote Camps (Norway House)

Norway House Cree Nation (NHCN) signed an Impact and Benefit Agreement with Flying Nickel Mining to develop the Minago Nickel Project in the Thompson nickel belt. NHCN plans to purchase and operate a 49-person exploration camp to support development and has previously purchased a smaller 24-person exploration camp, creating local employment opportunities in NHCN and neighboring communities.

St. Martin IOGC (Powerview Pine Falls)

1155327 B.C. Ltd. is an operating entity for David Forest, who has a history of success in identifying, founding and funding mineral development opportunities. The company is engaged in mineral exploration and is seeking funding for a drilling program aimed at Iron-Oxide-Copper-Gold (IOCG) deposits near St. Martin, Manitoba. IOCG deposits are significant sources of copper and other critical metals.

Willeson Metals (Lynn Lake)

Willeson Metals is a privately-owned Canadian mineral exploration company that focuses on acquiring, exploring, and developing high-quality gold and critical mineral projects in Manitoba. The company's four projects are located within the Lynn Lake greenstone belt in northern Manitoba. Willeson Metals is seeking support to explore and develop its Beaucage Project, which is located along the contact of the Lynn Lake Volcanic Belt and Kisseynew Gneissic Basin and targets gold.

Wolfden Resources (Snow Lake)

Wolfden Resources is an exploration and development company focused on high-margin metallic mineral deposits including base, precious and strategic metals. Wolfden Resources Corporation is seeking funding for geophysical surveying and drilling on its Rice Lake Island property to discover a new precious metal enriched deposit.
